DETAILED ACTION

1. This action is in response to the RCE of January 26, 2006.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Clark (US Patent 5,375,768).

Clark '768 discloses a sprinkler comprising a riser 16 for receiving a pressurized fluid, a nozzle 22, means for mounting the nozzle as recited, a turbine 56 mounted for rotation inside the riser, drive means for connecting the turbine to the nozzle as recited, and a valve that prevents by selectively re-directing the pressurized fluid around the turbine over-spinning of the turbine. The valve is capable of preventing the over-spinning regardless of the type of pressurized fluid since it acts on fluid pressures.
